

CONSUMER DUTY · ANNUAL BOARD REPORT

CONSUMER DUTY ANNUAL REPORT

Uinsure Ltd and Uinsure Commercial Ltd, combined. The first group-wide assessment of consumer outcomes, covering the reporting period 1 June 2025 – 31 May 2026.

JULY 2026

CONFIDENTIAL

CONTENTS

What this report covers.

01	Executive Summary	08	Vulnerable Customers
02	Governance & Accountability Framework	09	Complaints & Root Cause Analysis
03	Scope: Products, Services & Distribution	10	Closed Products & Services
04	Outcome 1 — Products & Services	11	Actions Log: Prior Period Commitments
05	Outcome 2 — Price & Value	12	Forward-Looking Strategy Assessment
06	Outcome 3 — Consumer Understanding	13	Board Declarations & Governance Sign-off
07	Outcome 4 — Consumer Support	14	Appendices

EXECUTIVE SUMMARY · 1.1 OVERALL ASSESSMENT

Substantially meeting our obligations, with improvements required.

OVERALL POSITION

Satisfactory — the business is substantially meeting its Consumer Duty obligations, with several areas of improvement being actively managed.

There are no areas that foreseeable or actual harm to customers has occurred without remediation being underway. Where standards fall short of where the business needs to be, actions and timescales are set out for the Board to satisfy itself they are adequate.

UINSURE POLICYHOLDERS

296,991

Live policies, as at 29 Jun 2026

UCL POLICYHOLDERS

EXECUTIVE SUMMARY · 1.3 MATERIAL ISSUES

Five material issues, each actively managed.

Every issue has a named owner, a target date, and a defined success metric in Section 12.3.

1	Davies claims acceptance — a recording issue, not customer harm Davies accepted 60% of claims versus a 71.9% benchmark. A root cause review confirmed every enquiry is logged as a formal claim — decision quality is accurate, with no evidence of unfair treatment.	Andy Murphy / Cormac Reader ● In progress · Q3 2026
2	Two renewals incidents — one closed, one in validation The December 2025 incident (~1,000 customers) is fully remediated and closed. The April 2026 commission-data re-run (~1,500 customers) is not yet remediated — validation is ongoing.	Jamie Thompson ● Validation · Sep 2026
3	Legal & home emergency cover — fair value concerns being resolved Both Arc Legal add-ons now assess as better value than first anticipated. Rate negotiation and a market tender run in parallel to a final provider decision.	Will Price ● Decision · 13 Jul 2026
4	Quality of sales calls — below our own target, but improving Internal call quality averaged 91% against a 95% internal standard in Uinsure Limited and 83% in UCL. New scripts, coaching and a quality framework are lifting scores; AI-assisted checks arrive in H2 2026.	Lauren Bagley / Sean Thompson ● Improving · H2 2026
5	Project Logan — delivery at risk The structural fix for digital self-serve, payments and end-to-end journey oversight. The September 2026 date is at risk from the Barclays build; the AI Lab is tasked with recovery. The Board is asked to confirm the trajectory remains acceptable.	Martin Schultheiss ● At risk · Sep 2026

EXECUTIVE SUMMARY · 1.4 IMPROVEMENTS

Significant improvements made this period.

99%+	URIS service — from amber to outstanding Calls answered 98–99%+ every month (target 95%); 15-second average queues; 100% admin in SLA.
1 → 3	Buy-to-let panel rebuilt Three active insurers, Tokio Marine expected imminently and Covéa under discussion.
74.5%	Fair value confirmed by claims data First product-level data: all three product types beat the FCA acceptance benchmark; blended loss ratio 43.60% vs 46.3%.
Improved	Ancillary products — action plan delivered Data gaps resolved, remuneration justified; both add-ons now assess as better value than anticipated. Provider decision 13 July.
Green	Consumer Understanding upgraded from Amber Sales CSAT 4.6 every month; Trustpilot 4.6 → 4.8; document clarity changes live 1 July target the most-cited exclusions.

44.1%	Complaint handling improved across the board Upheld rate below the 55% FCA threshold; informal resolution 13% → 28%; resolution time 35 → 29 days; 8 FOS referrals.
100%	Price optimisation live and delivering All new business since January 2026; retail premiums kept falling; UIA fee differential resolved.
172 → 25	Governance maturation Risk Committee and Customer Forum established; open actions cut from 172 to 25 by June 2026.
14 days	AI governance and AI Lab — live capability Acceptable Use Policy operational since March 2026; first AI Lab cell live within 14 days of launch.
5.31%	Vulnerable customer evidence base 13,581 customers identified; outcome data confirms no worse outcomes — obligations to vulnerable customers are being met.

EXECUTIVE SUMMARY · 1.5 FCA GOOD PRACTICE

Built to the FCA's good-practice findings.

In December 2024 and April 2026 the FCA published findings from its reviews of 180 first-year and 80 second-year board reports. This report responds directly to each.

FCA FINDING	THIS REPORT'S RESPONSE
Data quality — conclusions must be supported by robust data	44-metric Customer Lifecycle Dashboard; pricing data by insurer; complaint data by provider; loss ratio data introduced, with honest caveats on maturity
Views across the distribution chain — shortcomings in information exchange	Monthly partner data sharing; PowerBI dashboards for key partners; fair value assessment information obtained from all panel insurers
Analysis of different customer types — inadequate understanding of cohorts	Vulnerable customer monthly data; separate analysis by partner and channel; claims data by insurer
Board-level challenge — not evidenced	Board review of this report; Board minutes to be appended
Taking action — issues identified without robust plans	All material issues in Section 1.3 carry named owners, target dates and defined success metrics in Section 12.3

02

GOVERNANCE

The accountability framework, the forums that scrutinise customer outcomes, and how this report was produced.

Three interlocking forums scrutinise customer outcomes.

QUARTERLY · NED CHAIR

Risk Committee

Established Q3 2025, chaired by Jeremy Marsden (Non-Executive Director) with authority direct from the Board and full ExCo membership. Reviews customer vital signs, oversees compliance monitoring, and escalates material risks to the Board.

MONTHLY · HEAD OF CUSTOMER

Customer Forum

Formalised this period under Andy Murphy, with 22 cross-functional members. Reviews live customer issues and remediation against a risk-rated incidents log, plus the 44-metric Customer Lifecycle Dashboard, at every session.

STANDING · PRODUCTS & PRICING

Product & Pricing Committee

Oversees all product reviews, pricing decisions and fair value assessments. Provides assurance that price remedy rules are adhered to and approves every fair value assessment and ancillary product review.

Escalation to Board: Consumer Duty is a standing agenda item at the Risk Committee (quarterly), Customer Forum (monthly), Product & Pricing Committee, and ExCo via objectives and KPIs. Material risks and this annual report reach the Board directly through the Risk Committee's NED Chair.

Accountability sits with every Senior Manager.

2.2 · CONSUMER DUTY CHAMPION

The FCA removed the requirement for a dedicated Champion in 2025. The business concluded that a separate figurehead role was not proportionate — and risked implying Consumer Duty is one individual's responsibility rather than embedded across the organisation.

All Senior Managers hold Consumer Duty accountability through their individual **SM&CR Statements of Responsibility**, reinforced through ExCo objectives and KPIs and the governance forums in 2.1.

2.3 · HOW THIS REPORT WAS PRODUCED

- Input called from ExCo, all functional business areas, HR, product design, distribution, data, customer-facing support, and compliance business partners.
- Customer Lifecycle Dashboard data drawn from Davies, Covéa, Ageas, Integra, URIS and iCasework (Complaints platform).
- Independent second-line review conducted by Risk and Compliance.
- Exec Committee review 10 July 2026; submitted to the Board for review, challenge and approval at the July 2026 meeting.

03

SCOPE

The products, services and distribution chains in scope for Consumer Duty across both entities.

CONFIDENTIAL

INSURANCE
~~IS WAS~~
COMPLICATED.
WE REDESIGNED IT.

SCOPE · 3.1 IN-SCOPE PRODUCTS & SERVICES

Everything in scope, across both entities.

PRODUCT / SERVICE	WHO IT'S FOR	HOW IT'S SOLD	CUSTOMERS	STATUS
UINSURE LTD — DESIGNS AND SELLS ITS OWN PRODUCTS (MANUFACTURER & DISTRIBUTOR)				
Home Insurance (Buildings & Contents)	Homeowners	Mortgage advisers, bank and building society partners, or by phone	~228,000	● Open
Landlord / Buy-to-Let Insurance	Landlords	Recommended by advisers, or by phone	~69,000	● Open
Home Emergency Cover (Arc Legal)	Optional add-on for home customers	Included with the main policy purchase	~64,000	● Open
Family Legal Expenses (Arc Legal)	Optional add-on for home customers	Included with the main policy purchase	~55,000	● Open
Premium Finance (PCL)	Customers who pay monthly	Arranged when the policy is bought	59.63% of customers	● Open
Product Fee	All customers	£36, charged once when the policy is bought	All	● Open
UINSURE COMMERCIAL (UCL) — SELLS OTHER INSURERS' PRODUCTS (DISTRIBUTOR ONLY)				
Non-Standard Home Insurance	Homes a standard policy won't cover	18,000 brokers, Uinsure referrals, or online	~26,000+	● Open
Property Owners Insurance	Landlords and portfolio owners	Through brokers and Uinsure referrals	Included above	● Open
Legal & Emergency add-ons	Optional add-on for UCL customers	Included with the main policy purchase	Included above	● Open
Product Fee	All customers	£24–£100, depending on premium size	All	● Open
SME Packages	Small businesses	Existing policies only — closed to simplify and reduce risk	Existing only	● Closed

CONFIDENTIAL

INSURANCE
~~IS WAS~~
COMPLICATED.
WE REDESIGNED IT.

SCOPE · 3.2 DISTRIBUTION CHAIN RESPONSIBILITIES

Clear responsibilities across the distribution chain.

UINSURE LTD — MANUFACTURER & DISTRIBUTOR

Designs and underwrites household and landlord products with panel insurers as **lead co-manufacturer**, obtaining individual fair value confirmations from each insurer during the period. Sells through the IFA/broker network, affinity partnerships and direct channels.

Shares product performance data, fair value assessments and target market information with distributors — including **real-time PowerBI dashboards** for key partners — so they can meet their own Consumer Duty obligations. URIS Ltd administers policies under SLAs monitored monthly at the Customer Forum.

UCL — DISTRIBUTOR ONLY

Places customers with insurers from an **open market panel of 38 providers**, with 85% of business placed with the top 15, accepting business from a network of approximately **18,000 brokers** — Uinsure referrals now the largest single source of leads.

Obtains and reviews **manufacturer fair value assessments** for every product it distributes, refreshed at least annually, with a comprehensive tracking table maintained and continuously updated.

Fair value conversations deepening: the business has worked with distribution partners over the past 12 months on fair value and commission, with increasing openness to scrutiny of commission structures observed.

SCOPE · 3.3 CHANGES DURING THE PERIOD

Every scope change assessed through product governance.

CHANGE	DUTY ASSESSMENT	NOTES
Product changes live 1 July 2026 — tenancy definitions, Escape of Water excess, exclusion clarity, help text, family/UK resident definitions	● Assessed	Improvements to customer understanding and policy clarity, via P&PC
AXA added to standard household panel	● Assessed	Fair value assessment obtained; £600k GWP secured in first six months
New UCL fee band — £24 for sub-£150 premiums	● Assessed	Proportionate treatment of lower-premium customers
NatWest customer portal — phase 1 live July 2026	● Assessed	First digital self-serve touchpoint; phase 2 dependent on Logan
UCL B2C site launched — June 2025	● Assessed	Direct quote-and-buy route for specialist products
Price optimisation (WTW) — live November 2025	● Assessed	Reviewed by P&PC with controls embedded; no material issues identified

04 · Outcome 1

PRODUCTS & SERVICES

Products must be designed to meet the needs, characteristics and objectives of their target market, and must not cause foreseeable harm (PRIN 2A.3).

PRODUCTS & SERVICES · 4.1 TARGET MARKETS

Two distinct target markets, both evolving.

UINSURE LTD — ADVISED RETAIL, BROADENING

The core market has been the UK retail consumer buying through an **advised channel** — typically an IFA or mortgage adviser at the point of taking out or refinancing a mortgage, valuing quality of cover.

Since early 2025, migration campaigns have brought in older, more telephony-oriented cohorts, and new **bancassurance and retail partners** (NatWest, M&S, LBG, Barclays) will bring digital-first customers who may never have used an adviser. Target market definitions are actively monitored, and the 2026–2028 strategy explicitly reflects this broadening.

UCL — SPECIALIST & NON-STANDARD, SCALING

UK retail consumers and landlords with a **specialist or non-standard need** — prior claims, flood or subsidence risk, unoccupied properties, works, mid-to-high net worth, portfolio landlords, HMOs and holiday lets. GWP grew from **£8.8m to £12.4m (+41%)**; roughly 62% household, 33% property owners.

The non-standard book carries higher inherent vulnerability and E&O risk, requiring tighter operational management as it scales. **Saga selected Uinsure Specialist** as its main partner for all non-standard home business, further validating the proposition.

PRODUCTS & SERVICES · 4.2 FCA GI VALUE MEASURES

All product types exceed the FCA acceptance benchmark.

First full year of claims data by product type — resolving a prior-year reporting gap and enabling like-for-like comparison against the FCA's own benchmarks.

PRODUCT	ACCEPTANCE RATE	FCA BENCHMARK	VS BENCHMARK	CLAIMS FREQUENCY	FCA BENCHMARK
Buildings Only	65.4%	63.2%	+2.2pp	2.08%	2.80%
Contents Only	81.7%	73.5%	+8.2pp	1.67%	2.70%
Buildings & Contents	74.0%	70.7%	+3.3pp	3.02%	4.50%
Overall	74.5%	71.9%	+2.6pp	2.65%	—

CLAIMS FREQUENCY — WHAT IT MEANS

Our customers claim **less often** than the industry average. Because our acceptance rates are **above** benchmark, this points to well-matched cover with fewer surprises — not customers failing to use their policy. This was formally investigated and confirmed this period (prior action U7).

WHY ACCEPTANCE MATTERS

The acceptance rate is the FCA's most direct test of whether a product works **when customers need it most** — every product type pays out a higher share of claims than the industry benchmark.

CONFIDENTIAL

INSURANCE
~~IS WAS~~
COMPLICATED.
WE REDESIGNED IT.

PRODUCTS & SERVICES · 4.2 CLAIMS ACCEPTANCE BY INSURER

Four of five insurers on target; the Davies gap is definitional.

INSURER	JUN 2025	DEC 2025	MAY 2026	VS 71.9% TARGET
Davies	66.8%	67.0%	60.8%	Below throughout
Covéa	74.0%	80.8%	74.7%	On target
Ageas	87.6%	89.2%	78.7%	On target
Integra	87.5%	76.9%	75.1%	On target
RSA	n/a	77.8%	74.1%	On target

Rolling 12 months, June 2025 – May 2026. Target: FCA GI value measures benchmark ≥71.9%.

WHAT THE REVIEW FOUND

Davies' root cause review (June 2026) confirmed the variance is a **recording methodology issue, not a customer outcome concern** — every customer contact is registered as a formal claim, where other insurers filter enquiries out at first notification.

EVIDENCE OF FAIR TREATMENT

Decision quality confirmed accurate and consistent. Claims NPS consistently above the 40 target. May 2026 already reached **77%** under the current model; a minimum **+8pp uplift** is expected under the enquiry-led framework.

Next step: tripartite Davies–Uinsure–Allianz discussion to agree the enquiry-led framework. Allianz moves claims in-house by end 2026.

CONFIDENTIAL

INSURANCE
~~IS WAS~~
COMPLICATED.
WE REDESIGNED IT.

PRODUCTS & SERVICES · 4.2 CLAIMS BY PERIL

Four of five perils at or above the acceptance benchmark.

PERIL	REGISTERED	ACCEPTANCE RATE	AVG PAYOUT	AVG SETTLEMENT	POSITION
Escape of Water	1,705	86.6%	£7,117	78 days	Above benchmark — settlement reflects complexity
Accidental Damage	1,863	73.5%	£1,232	31 days	Above benchmark — monitored
Storm	1,137	47.8%	£3,206	32 days	Below benchmark — Davies recording effect
Fire	141	95.7%	£24,117	116 days	Above benchmark — settlement reflects complexity
Theft	303	85.8%	£3,377	44 days	Above benchmark — monitored

STORM ACCEPTANCE

Driven by the Allianz/Davies book, where enquiries are registered as claims — see **page 18**.

SETTLEMENT TIMES

EOW (drying-out, surveyors) and Fire reflect the inherent complexity of these perils, not a service failing. Benchmarks and exception reporting for long-running claims: Q4 2026 (**Commitment 14**).

CONFIDENTIAL

INSURANCE
~~IS WAS~~
COMPLICATED.
WE REDESIGNED IT.

PRODUCTS & SERVICES · 4.2 CUSTOMER SATISFACTION

Customers value the products; claims updates are the gap.

On Claims CSAT: a good score, just below the internal 4.5 target. Customer Forum analysis shows the gap reflects the frequency of updates during the claims process — not the claims outcome itself. Handlers are being worked with to increase proactive updates; monitored rather than a cause for concern.

PRODUCTS & SERVICES · 4.2 BUY-TO-LET PANEL

Buy-to-let panel rebuilt: one insurer to three, heading for five.

Last year's amber rating reflected single-insurer dependency after RSA's UK exit. The recovery directly improves availability and competitiveness for landlord customers.

INSURER	POSITION	STATUS
Ageas	Remains on panel — sole insurer following RSA's withdrawal from the UK market	● On panel
Prestige	Added to panel during the reporting period	● Added
Modus	Added to panel during the reporting period	● Added
Tokio Marine	Suspended pending wording amendments for the 1 July 2026 product changes — expected to return immediately after implementation	● Imminent
Covéa	Under active discussion for addition to the panel — not yet confirmed	● In discussion

CONFIDENTIAL

INSURANCE
~~IS WAS~~
COMPLICATED.
WE REDESIGNED IT.

05 · Outcome 2

PRICE & VALUE

The price customers pay must be reasonable relative to the overall benefits of the product or service (PRIN 2A.4).

CONFIDENTIAL

INSURANCE
IS WAS
COMPLICATED.
WE REDESIGNED IT.

PRICE & VALUE · 5.2 FAIR VALUE ASSESSMENTS

Fair value confirmed across the book; two add-ons decided 13 July.

Assessed under the refreshed, quantifiable framework — from the customer's perspective, not profitability alone.

PRODUCT	OUTCOME	KEY EVIDENCE
Household Home Insurance	Fair value confirmed	Claims acceptance, payouts, NPS/CSAT, Defaqto 5★
Buy-to-Let / Landlord	Fair value confirmed	Claims acceptance, Defaqto 5★, panel recovery
Home Emergency Cover (Arc Legal)	Improved — decision 13 Jul	Data gap resolved; better value than originally anticipated
Family Legal Expenses (Arc Legal)	Improved — decision 13 Jul	Frequency 0.19% vs 0.32% benchmark; remuneration justified
Premium Finance (PCL)	Confirmed — monitored	APR within range; provider transition complete
Product Administration Fee	Fair value confirmed	Consistent and proportionate across all customers
UCL — all distributed products	No issues identified	Manufacturer FVAs for all 38 insurers, refreshed annually

PRICE & VALUE · 5.3–5.4 PRICING

Household premiums fell 10.7% over the year.

Average household retail premium, declining all year

NEW BUSINESS, INC. CREDIT FINANCE CHARGE · JUN 2025 – MAY 2026

Source: new business pricing summary, Section 5.3. Landlord premiums broadly stable over the same period.

WHAT CHANGED

Premiums fell from **£390 to £349**, reflecting market normalisation after the high-inflation period — beneficial for customers. Optimisation reached 100% of new business from January 2026 with **no adverse impact** on price, claims or NPS.

PRICING PRINCIPLES

Payment method is **never** a rating factor, and no tenure-based pricing discrimination is applied — embedded in the Board-approved Pricing Policy.

Renewal parity: renewal pricing is generated from the same ratebook as new business — directly supporting the renewal pricing rules.

CONFIDENTIAL

INSURANCE
~~IS WAS~~
COMPLICATED.
WE REDESIGNED IT.

PRICE & VALUE · 5.5–5.6 FEES & PREMIUM FINANCE

One transparent fee; finance transitioned at a better APR.

ADMINISTRATION FEES — CONSISTENT AND TRANSPARENT

A single fee with **no MTA fees, no cancellation fees, and no hidden charges**. Household £36 for all customers — the UIA differential (£48 vs £36) was resolved through the price optimisation rollout in November 2025, closing a prior-year action. Landlord £48, applied consistently.

UCL charges a tiered fee (£24–£100 by premium band), introduced January 2025 to keep charges **proportionate for lower-premium specialist customers**.

PREMIUM FINANCE — CBPF TO PCL, NO CUSTOMER IMPACT

Close Brothers exited the market 17 May 2026; Uinsure transitioned to **Premium Credit Limited ahead of that date** with no customer impact — 59.63% of retail customers pay by instalments. Customer APR improved from 26.01% to **23.7%** — mid-table in the peer group and favourable against credit cards (24.9–29.9%) and overdrafts (~39.9%).

The APR sits ~5pp above the FCA Market Study peer average of 18.7% — **acknowledged and actively monitored**, with P&PC escalation if the position moves toward outlier status. Fair value assessment approved by P&PC on 6 May 2026; remuneration within all tolerances; PCL maintains **18 vulnerability groupings** with flexible payment solutions. Next FVA refresh April 2027.

PRICE & VALUE · 5.8 LOSS RATIO

Loss ratios sit in a healthy range, in line with the industry.

The loss ratio — claims paid against premium — is now embedded in the fair value framework and tracked through the Customer Lifecycle Dashboard and P&PC.

PRODUCT	CLAIMS PAID	GWP	LOSS RATIO	FCA BENCHMARK
Buildings & Contents (~77% of GWP)	£22.42m	£56.66m	39.57%	46.3%
Buildings (standalone)	£8.04m	£12.76m	62.96%	49.0%
Contents (standalone)	£1.49m	£4.14m	35.97%	32.4%
Full panel blended	£32.07m	£73.56m	43.60%	46.3%
Mature active book (excl. run-off and new capacity)	£29.88m	£63.39m	47.13%	46.3%

STANDALONE PRODUCTS

Buildings and Contents sit **above** their benchmarks — paying out proportionally more than the industry average, positive for customers.

READING THE BLENDED FIGURE

Two offsetting cohorts: a closed book in run-off (pushing upward) and newly onboarded capacity (suppressing downward).

CONFIDENTIAL

INSURANCE
~~IS WAS~~
COMPLICATED.
WE REDESIGNED IT.

06 · Outcome 3

CONSUMER UNDERSTANDING

Communications must support retail customers in making effective, timely and properly informed decisions (PRIN 2A.5).

CONFIDENTIAL

INSURANCE
IS WAS
COMPLICATED.
WE REDESIGNED IT.

CONSUMER UNDERSTANDING · 6.1 POINT OF SALE

Customers consistently understand what they buy.

SATISFIED WITH INFORMATION CLARITY

92%+

Target >90% — consistent across all channels

SALES CSAT

4.6

Target ≥4.5 — met every month; partner-branded 4.5–4.8

TRUSTPILOT

4.8

Improved from 4.6 — target reached March 2026

What the reviews say: customers specifically reference clear, unhurried advice with no pressure. Post-claims NPS of 56 (target >40) indicates customers generally understand the rationale for claims decisions — even where claims are not upheld.

CONFIDENTIAL

INSURANCE
~~IS WAS~~
COMPLICATED.
WE REDESIGNED IT.

CONSUMER UNDERSTANDING · 6.2 QUALITY ASSURANCE

Call quality below our own 95% bar, and improving.

D2C QA pass rates trending up since the intervention package

MONTHLY PASS RATE VS INTERNAL 95% TARGET · JUN 2025 – MAY 2026

The 95% pass rate is Uinsure's own internal standard, set above the regulatory minimum. No evidence QA scores are translating into worse customer outcomes.

THE INTERVENTIONS

QA framework and scorecard rewritten, non-sales call testing and minimum per-adviser scoring introduced (Jun 2025); bonus scheme rewritten (Oct); **digital scripting live Nov 2025**; induction, complaints and vulnerability training all rewritten.

THE TRAJECTORY

Retention pass rate up from **89.4% to 92.6%** pre/post-intervention. UCL improved from **81% to 84%** with Specialist Business Support Managers in place — directional, not yet at target.

H2 2026: AI call monitoring and automated file auditing will lift the proportion of calls reviewed far beyond manual capacity.

CONFIDENTIAL

INSURANCE
IS WAS
COMPLICATED.
WE REDESIGNED IT.

CONSUMER UNDERSTANDING · 6.3 DOCUMENTS

Documents test as readable; accuracy fixes are in flight.

READABILITY — FLESCH-KINCAID AS STANDARD

The whole household policy wording scores **Grade 9.8 (Green)** on a list-adjusted basis, and all four IPIDs score Green. Applied as standard to every customer-facing document before issue.

Two sections — Introduction & Definitions and Policy Conditions — rate Amber on sentence length; the **Privacy Notice rates Red** and is prioritised for improvement.

ACCURACY & BEHAVIOURAL EVIDENCE — IN PROGRESS

Product changes live **1 July 2026**: personal belongings and accidental damage exclusions explicitly stated, tenancy and residency definitions clarified, help text added through digital journeys. Brown & Brown's independent review identified **77 structural changes** to the household wording — under internal assessment with all panel insurers informed.

UserTesting contracted for 12 months and onboarded June 2026 — real customers observed using documents and digital journeys. First sessions July 2026.

CONSUMER UNDERSTANDING · 6.5–6.6 OVERALL ASSESSMENT

Rated Green, with in-progress areas tracked openly.

MEASURE	RAG	NOTES
Sales CSAT / NPS at point of sale	● Green	Consistently on or above target
Uinsure D2C QA	● Amber	Below 95% target; positive trend from November 2025; not linked to evidenced harm
UCL QA	● Amber	Below 95% target; multiple interventions underway
Document clarity — 1 July changes	● Green	Material improvements live
Document accuracy — Brown & Brown	● Amber	77 changes identified; insurer agreement in progress
Readability testing (Flesch-Kincaid)	● Green	Applied as standard to all documents
Behavioural testing (UserTesting)	● Amber	Platform contracted; first tests July 2026

Decline-reason indicator: 87.3% of declined claims fall under "policy exclusion" or "no section of cover" — an indicator worth exploring, not proof of misunderstanding. Structured RCA committed for Q1 2027 (Commitment 4).

WE REDESIGNED IT.

CONSUMER SUPPORT · 7.2 SERVICE SLAS

Support strong at URIS; internal and UCL lines recovered in H2.

SERVICE LINE	TARGET	12-MONTH RESULT	POSITION
URIS — calls answered	≥95%	98.1–99.4% every single month; queue time averaged 15s (target <60s); admin in SLA all but one month	● Outstanding
D2C — cancellations line	≥92.5%	Below target in H1 under migration volume pressure; recovered to 94.6% by May 2026	● Recovered
D2C — retention on contact	≥40%	41.7% rising to a 55.7% peak, ending at 47% — above target throughout	● Above target
UCL — broking lines	≥92.5%	Volume surge (2,700 → 7,500 calls/month) hit H1 answer rates; recruitment and the B2C site drove H2 recovery	● Improving
UCL — abandoned calls	—	15% average (Jun–Nov) improved to 9% (Dec–May) as inbound calls fell 14% and online renewals grew	● Improving

CONFIDENTIAL

INSURANCE
~~IS WAS~~
COMPLICATED.
WE REDESIGNED IT.

Sentiment above target across the journey.

METRIC	TARGET	12-MONTH RESULT	READING
Sales NPS — Uinsure & partner	>40	Average 69 on both, ranges 67–74 and 55–79	Stable, well above target
Sales CSAT — Uinsure & partner	≥4.5	4.6 every month; partner-branded 4.5–4.8	Consistently on target
Claims NPS	>40	Average ~61, range 37.5–100	Volatility reflects small survey samples, not instability
Claims CSAT	≥4.5	Average 4.3, range 3.7–4.8	Good score, just below the internal target — update cadence, not outcomes
Renewal NPS	>40	Average 40, range 31–51	Around target, variable
Trustpilot	4.8	Improved from 4.6 to 4.8	Target reached March 2026

CONSUMER SUPPORT · 7.4–7.5 FRICTION & OVERSIGHT

No barriers to exit; digital self-serve is the acknowledged gap.

FRICTION AND BARRIERS REVIEW

No cancellation fees and no MTA fees — customers can cancel by phone, in writing, or via their broker; no barriers to exit identified. Payment options extended during the period, including a **cheque process** for migrating customers unable to pay digitally.

Post-sale digital self-serve remains limited — an acknowledged gap. The NatWest portal (July 2026) provides the first digital touchpoint; Logan extends self-serve in phases from **September 2026**, starting with a small customer subset.

OUTSOURCED SUPPORT OVERSIGHT

All third-party support arrangements are overseen through the **Customer Forum (monthly)** and **Risk Committee (quarterly)**: URIS outstanding throughout; Davies calls answered 95–100% with the acceptance variance confirmed definitional; Covéa and Ageas on target; Arc Legal answering 95–99%.

Integra's claims acceptance is on target at 75.1%, though **telephony data has not yet been received** — a tracked MI gap. The live incidents log gives every open item a named owner and target date.

08

VULNERABLE CUSTOMERS

A cross-cutting obligation: customers with characteristics of vulnerability must receive outcomes at least as good as those for other customers.

CONFIDENTIAL

COMPLICATED.
WE REDESIGNED IT.

VULNERABLE CUSTOMERS · 8.1 IDENTIFICATION

Identification up sharply — better capture, not a worse book.

UINSURE VC CUSTOMERS

13,581

5.31% of 255,748 live policies at year end

HOUSEHOLD VC RATE

5.7%

From 3.6% in June 2025

UCL VC CUSTOMERS

2,462

9.2% of live policies — up from 690 (4%) prior year

MOST COMMON VULNERABILITY

Poor or non-existent digital skills — **25.3% of all VC**. Human support routes must be confirmed before AI-led interactions scale (Commitment 11).

CHANNEL SKEW

Bank (14.69%) and Building Society (12.57%) rates reflect systematic flagging at migration plus older demographics; the advised channel is lowest at 0.73%.

Tenure finding: new business shows a 9.16% VC rate, dropping to 3.88% at year one — the flag is captured well at sale but not consistently re-applied at renewal, so the true renewal-book VC population is likely higher. Project Logan enables longitudinal tracking to resolve this.

VULNERABLE CUSTOMERS · 8.3 OUTCOME COMPARISON

No evidence vulnerable customers receive worse outcomes.

The evidence demonstrates the firm is meeting its obligations to vulnerable customers and provides a strong foundation for the coming year.

METRIC	NON-VULNERABLE	VULNERABLE	GAP	RAG
Claims acceptance rate	69.68%	65.20%	−4.48pp — within the 0–5pp tolerance	● Green
Claims frequency	2.14%	1.51%	VC customers claim less often	● Green
Average payout	£5,174	£5,157	−£17 — essentially identical	● Green
New business premium	£264.78	£204.89	VC pay less — channel mix, not discrimination	● Green
Commission rates	21.45%	15.63%	VC pay less — structural channel driver	● Green

Still open: complaints-per-1,000 by VC status is pending manual extraction from iCasework (owner: Andy Murphy, before Board submission), and VC customers' over-indexing at the lowest buildings excess (49.7% vs 33.9%) will be monitored through the Customer Forum.

VULNERABLE CUSTOMERS · 8.2 & 8.4 STRATEGY IN ACTION

What changed under the vulnerability strategy.

~89 advisers	Vulnerability training across all consumer-facing teams Delivered to all D2C telephony staff and UCL Specialist Adviser teams — identification, communication style, recording, escalation.
Live	Cheque payment process introduced Accommodates older and migrating customers without digital payment capability; payment-friction complaints reduced.
Live	IVR journey redesigned with URIS Clearer routing for all inbound telephony customers; reduction in repeat contacts evidenced at the Customer Forum.
Aug 2026	Digital self-identification of vulnerability — planned Customers will be able to declare a vulnerability within digital journeys.
Partial	Accessible document delivery (large print, audio, braille) Email-based process in place via Latchams; automation outstanding — tracked as a live incident, moderate risk score 6.
Embedded	Financial difficulty support methodology Adopted across D2C consumer-facing teams for identification and support.
190 staff	Consumer Duty embedded in the all-company 3T Day Customer-focused workshops, June 2026 — 95% found them engaging. Training remains team-leader delivered; the dedicated L&D strategy (Commitment 1) addresses this.

COMPLAINTS & ROOT CAUSE

Volumes, upheld rates, and the root cause analysis behind them — across all four complaint registers.

CONFIDENTIAL

INSURANCE
IS WAS
COMPLICATED.
WE REDESIGNED IT.

COMPLAINTS · 9.1 VOLUMES & TRENDS — UINSURE LTD

Complaints peaked in February; upheld rate stayed below threshold.

Monthly complaint volume, with an identifiable February peak

UINSURE LTD · JUN 2025 – MAY 2026 · TOTAL 1,439

Source: Customer Lifecycle Dashboard. The April 2026 renewals issue is reflected in May volumes.

HEADLINES

1,439 complaints raised; average resolution **33 days**; full-year upheld rate **44.1%** — below the 55% FCA threshold, improving from 49% mid-year.

FOS REFERRALS

8 for the year: 2 upheld, 1 not upheld, 5 awaiting outcome — low volume, consistent with a complaints process that is working.

The distinction for the Board: the peak is attributable to specific, identifiable causes — not systemic conduct failures. Volumes are reducing from February.

WE REDESIGNED IT.

COMPLAINTS · 9.2 ROOT CAUSE ANALYSIS

Two root-cause themes: communication clarity and execution.

Complaints by FCA category group

996 CODED COMPLAINTS · JUN 2025 – MAR 2026

Single biggest specific root cause: "unclear guidance or arrangement" — 38.2% (380). Top granular reasons: failed to action request (19.8%) and waiting for terms or documents (15.0%).

THEME 1 · COMMUNICATION CLARITY — 40.9%

Customers unclear on what was said or agreed at sale or service; consistent with QA failure data. Five-why root: no dedicated L&D infrastructure. **Action:** digital scripting (live Nov 2025, QA improving) and the dedicated L&D Strategy — RC29, Martin Schultheiss, September 2026.

THEME 2 · EXECUTION FAILURES — 37.4%

Requests not actioned or documents delayed — 34.8% of granular reasons combined. Five-why root: manual handoffs between two systems and two organisations. **Action:** Project Logan resolves structurally (September 2026); joint Uinsure/URIS forum and daily comms as interim mitigations.

INSURANCE
~~IS WAS~~
COMPLICATED.
WE REDESIGNED IT.

COMPLAINTS · 9.1 & 9.4 PARTNER REGISTERS & HANDLING

Partner registers under pressure; handling measurably improving.

UCL · 259 COMPLAINTS

Volume up 564% — context matters

Driven by book growth (+41% GWP) and complaints training that means issues previously unrecorded are now captured. Upheld rate of 54% marginally exceeds the 53% GI intermediary benchmark; April's 85.2% was flagged at the Customer Forum and is under RCA. Most common root cause: service levels under volume strain.

URIS · ABOVE TARGET 10 OF 12 MONTHS

Upheld above 45% contract target

Root causes are admin and service complexity during partner migrations. Volumes are declining (42 in July to 23 in May) and all complaints resolve within 8 weeks. A joint monthly Uinsure/URIS complaints forum was introduced during the period. The May spike to 71% (on 23 complaints) is being investigated.

ICASEWORK · LIVE MARCH 2026

Handling measurably better

Informal resolution under 3 days more than doubled — 13% to 28% — and average resolution fell from 35 to 29 days. Detailing exact cancellation dates on URIS portal requests directly reduced the top complaint driver. Davies complaints-vs-claims (~12% vs 10.4% benchmark) is being worked on via triage-stage resolution.

CLOSED PRODUCTS & PRIOR ACTIONS

Outcomes for customers in run-off, and a full account of the 16 commitments made in the 2025 reports.

CONFIDENTIAL

INSURANCE
IS WAS
COMPLICATED.
WE REDESIGNED IT.

CLOSED PRODUCTS · SECTION 10

Closed-book customers exit through a clear rebroking path.

The Duty has applied to closed products since 31 July 2024. Three closed products are in scope: RSA-underwritten household policies, MPPI, and "Midas" non-standard products.

RSA RUN-OFF — MONITORED LIKE THE ACTIVE PANEL

The book has reduced from **~27,918 policyholders to 299** through natural renewal attrition. Outcomes are monitored on the same metrics as the active panel — acceptance rate, frequency, payout, complaints — with **no abnormal trends identified**.

The 63.2% loss ratio is consistent with run-off characteristics: a shrinking premium base against continuing claims — a mathematical effect, **not a deterioration in customer outcomes**.

REBROKING AT RENEWAL

At each renewal, the rebroking process **automatically presents an alternative quote** from an active panel insurer. No customer has been left without cover or required to seek insurance independently; the 299 remaining policyholders will be rebroked at their next renewal.

MPPI and Midas customer counts are **to be confirmed** before submission. No other closed products exist across either entity.

ACTIONS LOG · SECTION 11 PRIOR PERIOD COMMITMENTS

All 16 prior commitments accounted for.

8 closed or complete, 8 progressing — each with rationale and a revised timescale where needed.

U1	Project Logan	● Sep 2026	U9	Digital communications	● Phase 1 live
U2	AI integration	● Closed	U10	Non-advised digital product	● Evolved
U3	Customer documentation review	● Closed	U11	Co-manufacturer FVAs	● Complete
U4	Training & development	● Closed	C1	UCL training & competence	● Improving
U5	Risk Committee established	● Complete	C2	Aviva Development Zone	● Closed
U6	Data quality & self-serve reporting	● In progress	C3	UCL SLA improvement	● Improving
U7	Low claims frequency investigation	● Complete	C4	UCL cancellation analysis	● Q3 2026
U8	KRIs, metrics & thresholds	● Closed	C5	UCL vulnerability training	● Ongoing

New action N1: a dedicated group-wide Learning & Development Strategy (Martin Schultheiss, September 2026 Risk Committee). The Board is asked to confirm the rationale and revised timescales for open items are acceptable.

12

FORWARD VIEW

The Board must assess whether future business strategy is consistent with the Duty (PRIN 2A.8.5R).

FORWARD VIEW · 12.0 DELIVERY ROADMAP CY26/27

Logan remains the number one priority.

INITIATIVE	TARGET	CONSUMER DUTY RELEVANCE	STATUS
Project Logan	Sep 2026	Resolves journey, data integrity and self-serve gaps	● At risk
NatWest & M&S Q&B + Insurance Monitoring	1 Jul 2026	First Insurance Monitoring go-live — consent obligations	● Live
PCL premium finance transition	30 May 2026	Close Brothers exit managed with no customer impact	● Delivered
LBG partnership	Q3 2026	New large brand partner — distribution chain obligations	● In build
AXA / Ageas EDI	Oct 2026	Panel strengthening — claims and fair value implications	● In build
Barclays partnership	9 Nov 2026	New bank partner — customer characteristics assessed	● From Aug
NatWest & M&S phase 2 portals	Q1 2027	Self-serve; renters need a target market assessment	● In build
Essentials product	Q1 2027	Non-advised product — Duty assessment before launch	● Planned

On Logan: September is at risk from the Barclays build consuming capacity; the AI Lab is tasked with recovery. Full status update at the July meeting.

FORWARD VIEW · 12.1 STRATEGY ASSESSMENT

The 2026–2028 strategy is consistent with the Duty.

BOARD ASSESSMENT

Consistent — the foundational principle "Risk & compliance: solutions, not shortcuts" reflects the firm's view that growth and good consumer outcomes are not in tension.

THE THREE-YEAR DIRECTION

A pre-emptive, embedded platform leveraging large brands. Targets: **600,000+ customers**, 500,000 unique leads a year, access to 25 million customers through partners, an 85%+ renewal rate, and three or more large brand partnerships.

Logan's delivery remains the single most important near-term enabler of sustainable compliance at scale.

WHAT THE BOARD SPECIFICALLY CONSIDERED

- Distribution chain obligations scale with each new partner — frameworks reviewed at every go-live.
- Insurance Monitoring: customers must understand the monitoring, the data used, and the benefit before scaling.
- AI-led interactions require a Consumer Duty impact assessment before deployment at scale (Commitment 11).
- Pricing models monitored for precision and fairness across all customer groups; new products and segments fully assessed pre-launch.

FORWARD VIEW · 12.2 REGULATORY HORIZON

Two open consultations need the Board's attention.

Horizon scanning reviewed by the Risk Committee in June 2026. A full briefing on both consultations follows at the next Risk Committee.

DEVELOPMENT	STATUS	UINSURE / UCL ACTION
CP26/23 — Duty scope & proportionality	Open — closes 18 Sep 2026	Directly relevant to distribution chain reliance and product governance interaction; formal response being considered; briefing by Brionie Hemingway
CP26/22 — Simplifying the insurance rules	Open — published 26 Jun 2026	Legal and compliance review; response considered via P&PC
FCA Insurance Priorities 2026	Published Feb 2026	Assessment of risks and opportunities to be presented at the next Board meeting
FCA AI in Retail Financial Services	Recommendations summer 2026	Monitor — ISMS-POL-012 and Commitment 11 provide the governance foundation
Renters Rights Act	In force	Landlord product documentation updates — tracked as a live action
FCA Premium Finance Market Study	Final report Feb 2026	PCL transition complete; FVA approved; ongoing monitoring

FORWARD VIEW · 12.3 COMMITMENTS 2026–27

Eleven commitments for the year ahead, each owned and dated.

REF	COMMITMENT	OWNER	TARGET
1	Group-wide Learning & Development Strategy — structured, professionally resourced training	Martin Schultheiss	Sep 2026 Risk Committee
2	Loss ratio data by product type	Will Price	Delivered in this report
4	Structured RCA of "no section of cover" and "policy exclusion" claim declines	Will Price / Andy Murphy	Q1 2027
5	Formal vulnerable customer outcome comparison framework	Andy Murphy	Before 2026–27 report
6	Implement Brown & Brown policy wording changes, subject to insurer agreement	Lauren Bagley / Will Price	Before 2026–27 report
7	First UserTesting sessions on priority documents and journeys	Lauren Bagley	Q3 2026
8	Confirm and implement the ancillary provider decision	Will Price	13 Jul 2026
10	Confirm distribution policy status and present to Board	Owner TBC	Q3 2026
11	Consumer Duty impact assessment for AI-led sales, service and communications before scale	Brionie Hemingway / Tim Harrison	Q4 2026
13	Implement the Davies enquiry-led framework with Allianz	Andy Murphy / Cormac Reader	Q3 2026
14	Peril-level settlement-time benchmarks, with exception reporting for long-running claims	Andy Murphy	Q4 2026

DECLARATIONS · SECTION 13 GOVERNANCE SIGN-OFF

Four formal declarations required of the Board.

Recorded under PRIN 2A.8.4–5R. Sign-off by the Chair, Chief Executive and Non-Executive Director at the July 2026 meeting.

DECLARATION 1 · REVIEW AND APPROVAL

The Board confirms it has **reviewed this report** for the period 1 June 2025 – 31 May 2026 and approves it.

DECLARATION 2 · COMPLIANCE CONFIRMATION

Whether the Board is satisfied the firm is complying with PRIN 2A.
Recommended position: satisfied — substantially complying, with the improvement areas set out in Section 1.3 under active management.

DECLARATION 3 · STRATEGY CONSISTENCY

Whether future business strategy is consistent with the Duty.
Recommended position: consistent, per the assessment in Section 12.1.

DECLARATION 4 · AGREED ACTIONS

The Board **agrees the commitments in Section 12.3**, including named owners and target dates.
